

# Installation Collabora Online Development Edition

Nous récupérons la clé publique du dépôt

```
cd /usr/share/keyrings
sudo wget
https://collaboraoffice.com/downloads/gpg/collaboraonline-release-keyring.gpg
```

Nous ajoutons le dépôt

```
echo 'deb [signed-by=/usr/share/keyrings/collaboraonline-release-keyring.gpg]
https://www.collaboraoffice.com/repos/CollaboraOnline/CODE-debian11 ./' |
sudo tee /etc/apt/sources.list.d/code.list > /dev/null
```

Nous installons Collabora et le dictionnaire français

```
sudo aptitude update && sudo aptitude install apt install coolwsd code-brand
hunspell-fr
```

À suivre.
