

# Partitionnement

[virtualisation](#), [vms](#), [debian](#), [partitionnement](#)

La taille totale du disque sda est 16 GiB.

| Disque    | VG     | LV       | Montage        | Taille   | Format | Flags                        |
|-----------|--------|----------|----------------|----------|--------|------------------------------|
| /dev/sda1 | -      | -        | /boot          | 256 MiB  | ext4   | defaults                     |
| /dev/sda2 | vg_sys | lv_root  | /              | 4096 MiB | btrfs  | defaults                     |
| /dev/sda2 | vg_sys | lv_var   | /var           | 5120 MiB | btrfs  | defaults                     |
| /dev/sda2 | vg_sys | lv_log   | /var/log       | 2048 MiB | btrfs  | nodev,nosuid,noexec          |
| /dev/sda2 | vg_sys | lv_audit | /var/log/audit | 512 MiB  | btrfs  | nodev,nosuid,noexec          |
| /dev/sda2 | vg_sys | lv_tmp   | /tmp           | 2048 MiB | btrfs  | relatime,nodev,nosuid,noexec |
| /dev/sda2 | vg_sys | lv_swap  | swap           | 2048 MiB | btrfs  | defaults                     |
